Model Documentation of the Hysteresis System

1 Nomenclature

1.1 Nomenclature for Model Equations

```
\begin{array}{ccc} s_1 & & \text{switching treshold down} \\ s_2 & & \text{switching treshold up} \end{array}
```

 y_i output values of the hysteresis system for i = 1,2

 $T_{storage}$ time constant of the internal PT1

w input signal

2 Model Equations

Input Vector:

u = w

Equations:

[..] (1a)

Parameters: $s_1, s_2, y_1, y_2, T_{storage}$ Outputs: y

2.1 Exemplary parameter values

Symbol	Value
s_1	4
s_2	8
y_1	2
y_2	11
$T_{storage}$	0.0001

3 Derivation and Explanation

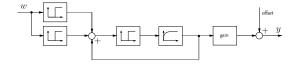

Figure 1: Block Diagram

4 Simulation

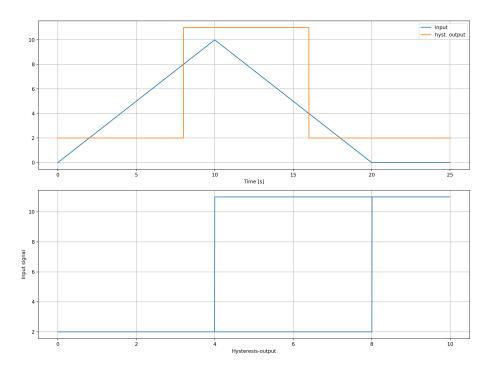

Figure 2: Simulation of the hysteresis system.
